

CHECKSFORLESS.COM®

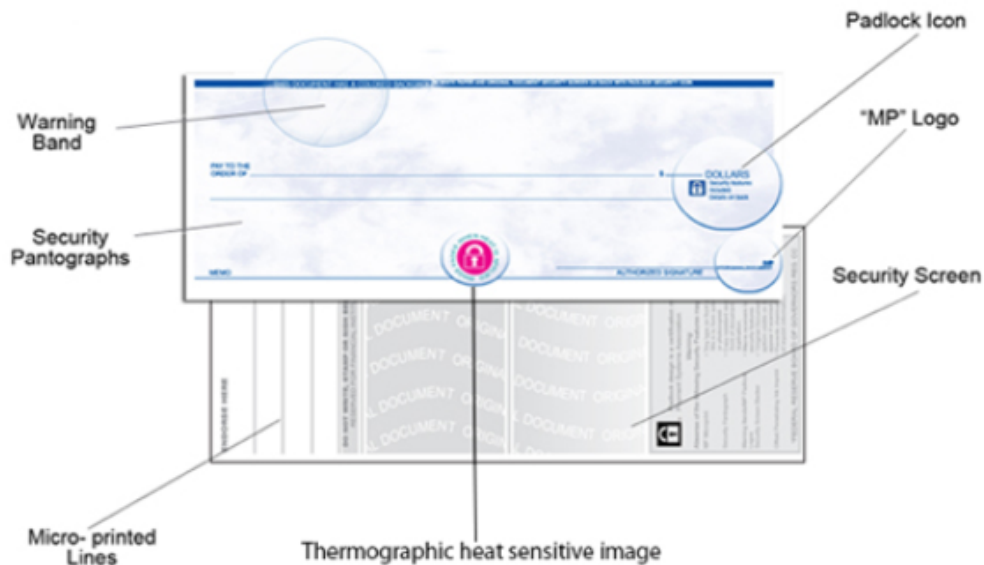

Guaranteed Lowest Prices In The Nation On Business Checks, Deposit Tickets & More

Which Business Check Security Features Should I Consider When Ordering?

Your business checks are an extension of your brand, and you want to ensure that they protect your business reputation, allow you to pay trusted vendors, and purchase items with confidence. That's why [business check security features](#) are so important to you, and it's why they are so important to Checksforless.com®

Everything You Need to Know About Check 21 Regulations

At Checksforless.com®, we guarantee your checks will meet or exceed industry bank processing standards including federal Check 21 regulations. All our products are fully compliant with Check 21 regulations. This regulation places certain requirements on the design, print quality and MICR encoding on banking products; a visual image is included below to best illustrate this:

What Other Business Check Security Features Prevent Fraud?

All Checksforless.com® checks exceed the security guidelines set by the industry and by the Check Payment Systems Association. As two examples, our checks feature security pantographs to limit reproducibility, as well as MicroPrinted Signature lines that are too small to be reproduced by a scanner.

Is Ordering Checks Online Safe?

We've worked hard to make this answer a clear yes. Our SSL (Secure Sockets Layer) Certificate has been bought through thawte.com and is enabled for data protection. It's utilized throughout our site on our checkout page, the order submittal page, whenever you log in, whenever you go to edit your account or create a new account, whenever you view your order history, and whenever you go to a form to send us an email from the contact section of our website. All data transferred to and from SSL enabled pages is encrypted for the protection of your privacy.

Additionally, our system checks for combinations of common elements of fraudulent orders: changes in the ship to address on reorders; different ship to, imprint and billing information; and deliveries to Post Office boxes and other non-physical addresses. Credit cards are processed through Address Verification Services to verify both the name and address on the card. We also have security checkpoints throughout the ordering process, such as verifying your bank routing number for extra protection.

How Do You Protect MY Identity on Your Site?

When it comes to your personal and financial information, we know that this is extremely sensitive and private information and we protect it at all costs in many ways, detailed below.

Enhanced Identity Lock Theft Protection: To help protect our customers' sensitive information, we will display a unique challenge question whenever you attempt to access secure information on our site when your browser has been opened for the first time. This double verification process greatly increases the level of security in the event your password has been compromised or your computer has been accessed locally or by a hacker.

3rd-party security validation: The security of our site and outside server access is validated daily via an independent 3rd party whose certification is the only security scanning technology recognized to meet both the U.S. government's benchmark FBI/SANS security test and the security standards of all major credit card companies - including Visa CISP and AIS, MasterCard SDP, American Express CID, and Discover Card DISC security audits and Payment Card Industry (PCI) Data Security Standard.

Commitment to keeping your private information private: Checksforless.com® is committed to protecting your private information. Your information is used to provide a more customized shopping experience and to process orders. We may also use your information to communicate with you about products, services and future promotions. Checksforless.com® will never share customer information, including names and mailing addresses, with third parties.

Additionally:

- We do not sell, rent, or lease our customer lists to third parties.
- We do not permanently store your credit card information.
- You have the ability to control our communication with you.

Last, but certainly not least, Checksforless.com® is a member of the Better Business Bureau Online, an organization known for its expertise and experience in conducting successful national self-regulation. Visit our [business check security features](#) page to learn more.
